

PHACS K-8 MODEL

PREPARING SCHOLARS TO SOLVE THE PROBLEMS OF TOMORROW

PREPARING SCHOLARS FOR COLLEGE & FOR LIFE

As a K-12 organization, we truly believe that no matter where we get a kid from, if you pair children with the right adults, they can be successful in college and life. We believe that teachers who are equipped with key instructional tools and practices are able to create learning spaces that can push a child's imagination and get them to ask key questions that ignite the flame for learning and growth.

We know that curiosity, high engagement, and high focus are what's going to lead our scholars to success.

K-8 OVERVIEW
